

**Reaching goals together!**

**WE ARE TRADING  
IN TOMORROW'S  
MARKETS!**

Our Janico group combines the subsidiaries of Janico Management AG, Tegum AG, Plica AG, Plica GmbH, and Casaton AG. As an owner-managed family-owned company, we are concerned about sustainable and successful further development of our companies. Our employees, working with great dedication, passion, and team spirit to meet customers' needs every day, form the basis for our long-term success.

Our corporate history has roots going back all the way to 1919. We have always consistently aligned our actions with the needs of our customers and partners in and outside of the country.

Specialising in trade logistics services, we provide measurable added value for technical solutions in the industry, construction, and trade. Digital technologies ensure efficient processes and smart data management.

Our modern logistics and highest stock availability guarantee for quick and uninterrupted regional and global supply chains. We offer a broad range of high-quality products for

specialists in the defined industries. We will customise any product for you in our in-house workshops. Our global network of leading partners allows us to develop continually. This combination makes us unique.

Our central services in logistics, administration, quality management, and information technology allow Janico group to profit of synergies and enable subsidiaries to fully focus on procurement, marketing, and sales. In the end, all of our partners from industry, construction, and trade can profit from this.

We are employing about 100 motivated employees. We focus specifically on ongoing training and further education in the team. We have also trained apprentices since 1940.

We are set up optimally to be your reliable, strong, and valued partner.

We act with passion!

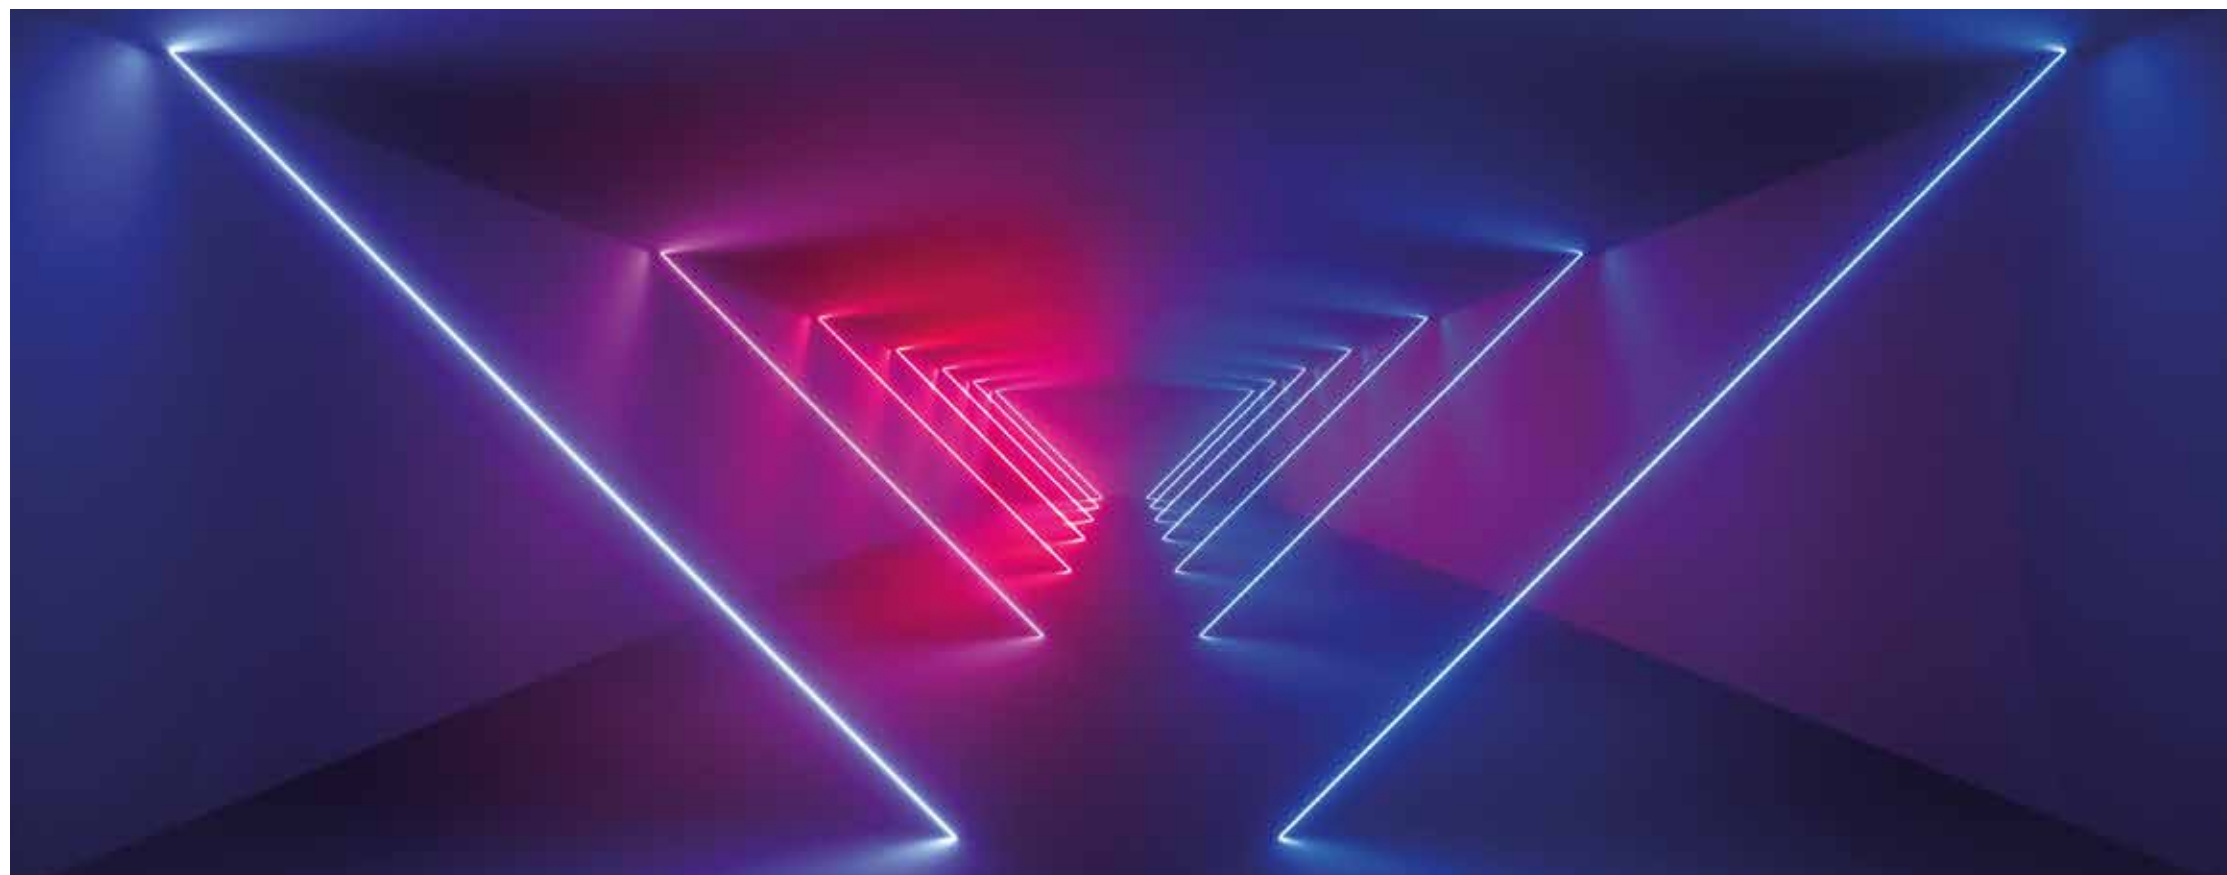

## The dynamic partner for construction, craft, and specialist trade

**PLICA**

**Everything, no art.**

Plica is a **leading** supplier of system components for electrical engineering and industrial applications. Large stocks in our Frauenfeld and Constance sites **ensure best availability** in Switzerland and internationally around the clock. We have acquired a high degree of popularity among electrical installers in the course of many decades. The producing industry has become an important pillar for us in the last ten years. We want to strategically develop our market shares in the industry in a sustainable manner.

**Innovations** and **system solutions** are at our focus. Leading manufacturers support us in this together with you as an industrial user.

Innovations and further developments can only be developed and cultivated together. We are therefore looking forward to a mutual successful exchange with you. **Challenge us!**

- Uniquely wide and deep range with more than 25,000 items
- Fast and reliable deliveries
- Outstanding service across all levels – digitally or in person
- We exhibit an innovative spirit and always pay attention to your development ideas
- Sustainable thinking and action

## Your competent partner for slab-laying profiles Bonding solutions, customisation services

Slab-laying profiles  
Waterproofing systems  
Construction materials  
Uni- and bilateral adhesive tapes  
Surface protection films  
Adhesives and sealants  
Individual customisation services  
Hook-and-loop and push closures  
Working gloves  
Construction accessories  
Occupational safety and health protection

### Reasons to rely on us

#### Broad range

Our core range comprises more than 1000 different slab-laying profiles and more than 53 different waterproofing systems in the slab area, a wide range of more than 510 different technical adhesive tapes, surface protection films, hook-and-loop solutions, as well as adhesives and sealants.

Our range is completed by items from tools as well as occupational safety and health protection for the entire construction craft.

#### Quick order processing

Our innovative supply-chain management system continually optimises the work steps from order receipt to delivery, constantly improving and shortening order processing.

#### Quality and innovation

Market proximity ensures that we are familiar with the requirements and needs of our customers. Our know-how

and high quality standards enable us to live up to your needs. Certified to ISO 9001:2015.

#### Individual customer support and services

Our office staff and field service team warrant individual customer support. Our service offering covers everything from specific trainings to procurement and joint development of customer-specific solutions. Furthermore, we have a diverse fleet of machinery for roll customisation. We will cut any type of textile, film, membrane, adhesive tape, leather, etc.

#### High readiness for delivery

We warrant high and reliable readiness to deliver from our logistics centre in Frauenfeld. We maintain reliable partnerships with our global procurement sources.

#### Environmental protection

We take care of the environment. We handle resources as economically as we can together with our producers, suppliers, and customers.

## We act with passion

### **Order placed today, delivery received tomorrow! Our highly motivated employees make sure of that.**

An efficient warehouse system ensures quick access, high turnover performance, short transport paths and transport times, as well as good delivery quality and flexibility through systematic and controlled stockkeeping. Digital technologies ensure efficient processes, real time processing, and smart data management. Our many different products result in operation of a mix of conventional and fully automated warehouse systems.

### **We use the following warehouse types:**

- High-bay warehouse
- Vertical conveyors (Kardex shuttle)
- Block storage
- Small-parts storage
- Cooling cells
- Hazardous goods storage
- External storage

### **We have**

- a storage area in excess of 24,000 m<sup>2</sup>
- a storage volume in excess of 104,000 m<sup>3</sup>

The storage halls are closed and temperature-controlled. Temperature-sensitive products are monitored for temperature fluctuations.

### **Training apprentices**

We are passionate about giving young people a chance for training and thus perspectives for the future. We believe that it is our task to keep on sharing our own knowledge to contribute to future logistics specialists.

### **Customisation and production**

We will customise any product for you in our in-house customisation. In addition to simpler mechanical work or packaging tasks, our in-house machinery processes many different materials, such as tissues, films, adhesive films, laminated plastics, and many others. Our diverse services for small and large series productions comprise, among other things, cutting, punching, hot-cutting, rewinding, lamination, coating, bonding, etc.

We create added value! Contact us. We will gladly advise you.
